# Contents

**Quasi-Conformal Geometry and Hyperbolic Geometry** ..... 1
*Marc Bourdon, Hervé Pajot*
1 Introduction ..... 1
2 Basic Tools in Geometric Function Theory and Quasi-Conformal Geometry ..... 1
3 Gromov Hyperbolic Groups: a Motivation for Quasi-Conformal Geometry ..... 5
4 Further Properties of Loewner Spaces and Spaces with Poincaré Inequalities ..... 8
5 Differentiability of Quasi-Symmetric Homeomorphisms, Applications to Quasi-Isometry ..... 11
References ..... 15

**On and Around the Bounded Cohomology of $\mathrm{SL}_2$** ..... 19
*Marc Burger, Nicolas Monod*
1 Introduction ..... 19
2 Notations and Conventions ..... 22
3 A Differential Group ..... 23
4 Constructing Cocycles ..... 29
5 Above Degree Two ..... 33
References ..... 36

**Exceptional Sets in Dynamical Systems and Diophantine Approximation** ..... 39
*M. M. Dodson*
1 Introduction ..... 39
2 Rotation Number ..... 40
3 Very Well Approximable Numbers and Khintchine's Theorem ..... 44
4 Kolmogorov–Arnol'd–Moser (KAM) Theory ..... 46
5 Linearisation ..... 49
6 Diophantine Approximation in Hyperbolic Geometry ..... 51
7 Extremal Manifolds and Flows ..... 55
8 Conclusion ..... 56
References ..... 57

**An Introduction to Cocycle Super-Rigidity** ..... 61
*Renato Feres*
1 Introduction ..... 61
2 Cocycles over Group Actions ..... 62

3 Cocycles and Principal Bundle Actions ..... 67
4 Semisimple Lie Groups, in a Hurry ..... 75
5 All the Ergodic Theory We Need ..... 79
6 The Algebraic Hull ..... 82
7 Super-Rigidity ..... 85
8 The Proof ..... 86
9 A Few Immediate Applications ..... 93
References ..... 95

**Rigid Geometric Structures and Representations of Fundamental Groups** ..... 97
*David Fisher*
1 Introduction ..... 97
2 Rigid Structures, Killing Fields and Representations of Fundamental Groups ..... 99
3 Representations of the Fundamental Group and Dynamics of the Action ..... 101
4 Constructing Quotients from Representations of $\pi_1$ ..... 105
References ..... 108

**Coarse-Geometric Perspective on Negatively Curved Manifolds and Groups** ..... 111
*Alex Furman*
1 Introduction ..... 111
2 The Geometric Setup ..... 112
3 Basic Notions of the Coarse-Geometric Setup ..... 117
4 Some Results ..... 121
References ..... 127

**On Orbit Equivalence of Measure Preserving Actions** ..... 129
*Damien Gaboriau*
1 Equivalence Relations ..... 129
2 Measure Equivalence ..... 132
3 Cost of an Equivalence Relation ..... 136
4 $\ell^2$ Betti Numbers for Groups ..... 139
5 Simplicial Actions of an Equivalence Relation ..... 142
6 Actions of the Equivalence Relation on a Simplicial Complex ..... 143
7 $\ell^2$ Betti Numbers for Equivalence Relations and Their Actions ..... 144

**The Margulis Invariant of Isometric Actions on Minkowski (2+1)-Space** ..... 149
*William M. Goldman*
1 Introduction ..... 149
2 Affine Representations ..... 150
3 Lorentzian Geometry ..... 152
4 Deformation Theory ..... 153

5 Properness . . . 156
6 Linear Growth . . . 157
7 Triangle Group Deformations . . . 158
References . . . 160

**Densité d'orbites d'actions de groupes linéaires et propriétés d'équidistribution de marches aléatoires** . . . 165
*Jean-Pierre Conze, Yves Guivarc'h*
1 Introduction . . . 165
2 Ensemble limite, ensemble asymptotique . . . 167
3 Densité d'orbites de $\mathbf{\Gamma}$ dans $\mathbf{L}_{\mathbf{\Gamma}}(\mathbb{R}^{\mathbf{d}})$ et équirépartition . . . 173
4 Actions sur les variétés de drapeaux homogènes . . . 185
5 La méthode des équations fonctionnelles . . . 188
6 Actions des sous-groupes $\mathbf{N}$ et $\mathbf{A}$ sur $\mathbf{\Gamma}\backslash\mathbf{G}$ et $\mathbf{\Gamma}\backslash\mathbf{G}/\mathbf{M}$ . . . 194
References . . . 200

**Diophantine Approximation in Negatively Curved Manifolds and in the Heisenberg Group** . . . 203
*Sa'ar Hersonsky, Frédéric Paulin*
1 Introduction . . . 203
2 The Survey Part . . . 204
3 Diophantine Approximation in the Heisenberg Group . . . 213
References . . . 225

**Appendix: Diophantine Approximation on Hyperbolic Surfaces** . . . 227
*Jouni Parkkonen, Frédéric Paulin*
References . . . 236

**Bounded Cohomology, Boundary Maps, and Rigidity of Representations into** $\mathrm{Homeo}_+(\mathbf{S}^1)$ **and** $\mathrm{SU}(1,n)$ . . . 237
*Alessandra Iozzi*
1 Introduction . . . 237
2 The Proof of the "Formula" . . . 242
3 $\Gamma$-Equivariant Measurable Maps into $\mathcal{M}(\mathbf{S}^1)$ . . . 247
4 Semiconjugacy and the Proofs of Matsumoto's and Goldman's Theorems . . . 250

**SAT Actions and Ergodic Properties of the Horosphere Foliation** . . . 259
*Vadim A. Kaimanovich*
1 Ergodic Properties of SAT Actions . . . 259
2 The Horosphere Foliation and the Horocycle Flow . . . 263
3 Ergodicity of Busemann Cocycles . . . 267
References . . . 278

**Nonexpanding Maps, Busemann Functions, and Multiplicative Ergodic Theory** ..... 281
*Anders Karlsson*
1 Introduction ..... 281
2 Busemann Functions ..... 282
3 Subadditivity ..... 283
4 Nonexpanding Maps with Unbounded Orbit ..... 284
5 Multiplicative Ergodic Theory ..... 286
6 Nonexpansive Iterates in Banach Spaces ..... 289
References ..... 290

**The Phase Space of $k$-Surfaces** ..... 293
*François Labourie*
1 Presentation ..... 293
2 The Geodesic Flow ..... 293
3 One More Dimension ..... 294
4 A Hyperbolic Example ..... 296
5 Geometric Properties of $k$-Surfaces and Examples ..... 296
6 Phase Space ..... 298
7 Transversal Measure and Coding ..... 300
8 Questions ..... 303
References ..... 305

**Schottky Subgroups of Mapping Class Groups and the Geometry of Surface-by-Free Groups** ..... 307
*Lee Mosher*
1 Introduction ..... 307
2 Schottky Subgroups of Mapping Class Groups ..... 308
3 Geometry of Surface-by-Schottky Groups ..... 311
4 Stable Quasi-Geodesics in Teichmüller Space and the Ending Lamination Conjecture ..... 314
References ..... 316

**Actions of Semisimple Lie Groups with Stationary Measure** ..... 319
*Amos Nevo, Robert J. Zimmer*
1 Introduction ..... 319
2 Examples of Actions Without an Invariant Measure ..... 320
3 Stationary Measures ..... 321
4 A Structure Theorem for Stationary Measures ..... 324
5 Real Rank One Groups: Some Constructions ..... 326
6 Structure Theorems: Groups of Real Rank at Least Two ..... 328
7 Ergodicity Conditions and the Existence of Projective Factors of Full Entropy ..... 331
8 Construction of Projective Factors or Actions of Factor Groups ..... 336

9 Expanding Versus Contracting Automorphisms, and Margulis' Normal Subgroup Theorem . . . 339
References . . . 340

**On the Cohomology of Anosov Actions** . . . 343
*Viorel Niţică, Andrei Török*
1 Cocycles . . . 343
2 Partially Hyperbolic and Anosov Actions . . . 345
3 Livsic Theory . . . 346
4 Regularity Results . . . 349
5 Higher Rank Abelian Actions . . . 351
6 Applications to the Rigidity of Higher Rank Lattice Actions . . . 354
References . . . 357

**Harmonic Analysis and Hecke Operators** . . . 361
*Hee Oh*
1 Uniform Pointwise Bounds $\xi_S$ for Matrix Coefficients . . . 361
2 Equidistribution of Hecke Points . . . 365
3 Equidistribution of Integer Points on a Family of Homogeneous Varieties . . . 368
4 Distributing Points on the Spheres $S^n$ $(n \geq 4)$ . . . 372
References . . . 374

**$L^p$-cohomology and pinching** . . . 377
*Pierre Pansu*
1 Introduction . . . 377
2 $L^p$-Cohomology . . . 379
3 The Künneth Formula . . . 381
4 Pinched Manifolds . . . 384
5 Non-Vanishing of Torsion . . . 384
6 Vanishing of Torsion for $H^2_{\mathbf{C}}$ . . . 386
References . . . 386

**Classical and Non-Linearity Properties of Kac–Moody Lattices** . . . 389
*Bertrand Rémy*
1 Introduction . . . 389
2 A Classical Arithmetic Situation and its Geometric Formulation . . . 390
3 Kac–Moody Theory and the Generalization . . . 393
4 Questions Arising from the Generalization . . . 398
References . . . 402

**Actions of Maximal Tori on Homogeneous Spaces** . . . 405
*George Tomanov*
1 Introduction . . . 405

2 $K$-Algebraic Groups, Arithmetic Subgroups and Central Simple Algebras ... 410
3 Reductive $\mathbb{Q}$-Subgroups of $\mathbf{SL}_1(A)$ ... 414
4 Homogeneous Orbit Closures Containing Relatively Compact $T$-Orbits ... 417
5 Closed $T$-Orbits ... 419
References ... 421

**Dynamics on Parameter Spaces: Submanifold and Fractal Subset Questions** ... 425
*Barak Weiss*
1 Introduction ... 425
2 Conjectures and Results ... 427
3 A Gentle Reminder Regarding Dynamics on Homogeneous / Quadratic Differential Spaces ... 429
4 Quantitative Nondivergence and Applications ... 432
5 Khinchin's Convergence Case for Fractals ... 434
6 Logarithm Laws on a Teichmüller Horocycle ... 437
References ... 439

**Superrigid Subgroups and Syndetic Hulls in Solvable Lie Groups** ... 441
*Dave Witte*
1 What Is a Superrigid Subgroup? ... 441
2 Other Superrigidity Theorems ... 445
3 Our Prototypical Proof of Superrigidity ... 448
4 Solvable Lie Groups and Zariski Closed Subgroups ... 452
5 Existence of Syndetic Hulls ... 454
References ... 457

**Square Tiled Surfaces and Teichmüller Volumes of the Moduli Spaces of Abelian Differentials** ... 459
*Anton Zorich*
1 Motivations ... 459
2 Translation Surfaces Versus Flat Surfaces ... 460
3 Moduli Spaces of Abelian Differentials ... 461
4 Counting Volume by Means of Counting Integer Points ... 462
5 Two Examples of Computation ... 463
A Volumes of Some Strata of Abelian Differentials ... 467
B Lyapunov Exponents of the Teichmüller Geodesic Flow ... 468
C Conjectural Probability $P(n)$ of $n$ Bands of Trajectories for a Rational Interval Exchange Transformation ... 469
References ... 471

**On property (T) for Discrete Groups** ..... 473
*Andrzej Żuk*
1 Introduction ..... 473
2 Expanders ..... 474
3 How to Prove Property (T) ..... 476
4 Random Groups ..... 478
References ..... 480

**Index** ..... 483
