HW 3
Due 02/06, at the beginning of class.

Use regular sheets of paper, stapled together.
Don't forget to write your name on page 1.

1. Determine if the following subsets of $\mathbb{R}^3$ are subspaces.

(a) (0.5 points) $\{(a_1, a_2, a_3) \in \mathbb{R}^3 : 2a_1 - 3a_3 = 0\}$

(b) (0.5 points) $\{(a_1, a_2, a_3) \in \mathbb{R}^3 : a_1 - 2a_2 + a_3 = 1\}$

(c) (0.5 points) $\{(a_1, a_2, a_3) \in \mathbb{R}^3 : 2a_1 = a_3\}$

(d) (0.5 points) $\{(a_1, a_2, a_3) \in \mathbb{R}^3 : 2a_1 = 5a_3 \text{ and } 4a_2 = a_1 + a_3\}$

2. Determine if the following subsets of the vector space of 2×2 matrices with real entries are subspaces. You may assume as true that the set of 2×2 matrices with real entries forms a vector space with the usual addition and scalar multiplication.

(a) (0.5 points) $\left\{ \begin{pmatrix} a_1 & a_2 \\ a_2 & a_2 \end{pmatrix} : a_1, a_2 \in \mathbb{R} \right\}$

(b) (0.5 points) $\left\{ \begin{pmatrix} a_1^2 & a_3 \\ a_2 & a_1^2 \end{pmatrix} : a_1, a_2, a_3 \in \mathbb{R} \right\}$

3. (2 points) Let W_1, W_2 be two subspaces of a vector space V. Prove that the intersection $W_1 \cap W_2$ is a subspace of V.

4. (2 points) Let W_1, W_2 be two subspaces of a vector space V. Prove that the union $W_1 \cup W_2$ is a subspace of V if and only if $W_2 \subseteq W_1$ or $W_1 \subseteq W_2$.

5. (2 points) Section 1.3, Problem 30

6. (1 point) Which vectors $(a, b, c) \in \mathbb{R}^3$ are in $\text{span}(\{(2, 1, 4), (1, 0, 1), (3, 1, 5)\})$?
