## $\underline{\text { HW \#7 }}$

Please, write clearly and justify all your steps, to get proper credit for your work.
(1) [9 Pts] Let $X$ and $Y$ have the following joint p.d.f. Compute $\mu_{X}, \mu_{Y}$, $\sigma_{X}, \sigma_{Y}$ and $\rho$ in each case:
(a)

|  | $\mathbf{x}$ |  |  |
| :---: | :---: | :---: | :---: |
| $\mathbf{y}$ | 1 |  | 2 |
| 1 | 0.5 |  | 0 |
| 2 | 0 |  | 0.5 |

(b)

|  | $\mathbf{x}$ |  |  |
| :--- | :---: | :---: | :---: |
| $\mathbf{y}$ | 1 | 2 |  |
| 1 | 0.25 | 0.25 |  |
| 2 | 0.25 | 0.25 |  |

(c)

|  | $\mathbf{x}$ |  |  |
| :---: | :---: | :---: | :---: |
| $\mathbf{y}$ | 1 | 2 |  |
| 1 | 0.1 |  | 0.4 |
| 2 | 0.4 |  | 0.1 |

(2)[6 Pts] Let $X$ and $Y$ have the following joint p.d.f.

|  | $\mathbf{x}$ |  |  |
| :---: | :---: | :---: | :---: |
| $\mathbf{y}$ | 1 | 2 | 3 |
| 1 | 0.05 | 0.15 | 0.15 |
| 2 | 0.10 | 0.10 | 0.10 |
| 3 | 0.15 | 0.15 | 0.05 |

(a) Calculate the marginal densities. Are $X$ and $Y$ are independent?
(b) Compute the means and variances.
(c) Computate the correlation coefficient. Are $X$ and $Y$ positively correlated? negatively correlated? uncorrelated?
(3)[4 Pts] Consider the random variables $X$ and $Y$ with joint p.d.f. given in Problem (2). Obtain the mean and variances of the following random variables:
(a) $Z=2 X+3 Y$;
(b) $W=2 X-3 Y$.
(4) [6 Pts] Consider the bivariate function $f(x, y)=c(x+y)$, for $x=0,1,2$, $y=0,1$.
(a) Find the appropriate constant $c$ so that $f$ is a probability density function
(b) Compute the marginal densities for $X$ and $Y$ and calculate their means and variances.
(c) Are the random variables $X$ and $Y$ independent?
