Subject: Math 3303 Welcome Email

Hi, everybody,

Welcome to Math 3303!

I'm Virginia Hollyer, your teacher for Math 3303. You may call me Ms. Leigh; it's my middle name. Now Math 3303, as you know, is online BUT it's not self-paced. There are homework, popper, and essay deadlines to be met.

There is no textbook for the course. You will watch the videos on my website and follow along in the Notes, also on my website. My website is:

www.math.uh.edu/~dog

scroll down to Math 3303 and click.

The course policies, grading scheme, and calendar are all on my website too. All kinds of information is there.

You will need a CourseWare account for this course. We don't use Blackboard in Math. If you already have one, great!

If not, the link to set one up is on my website. You will have to get your biometric data on file with CASA Testing at the beginning of the semester, too. The info for this is on the home page of the CourseWare site. Be sure to get this done.

Scheduling your midsemester and final are done through this CourseWare site and check in to take the tests requires your photo and fingerprints.

Your first graded assignment is Popper Zero. You will post your answers to the Popper Zero electronic multiple choice forms (EMCFs) in CourseWare by the deadline. The Popper Zero questions are about the administrative facts of the course. It's due before midnight on Friday, August 30. So be SURE to get your CourseWare account promptly. Popper Zero is a GRADED assignment.

Again: Welcome. Email me if you have questions. Be sure to put "Math 3303" in the subject line so I know to open and answer your email right away! I'm here Mondays, Tuesdays, and Thursdays doing email first thing.

This material will be new to you. And the course format might be new, too. Much of it will be fun, though.

I'm looking forward to working with you this Fall.

Ms. Leigh
