

MATH 5331: LINEAR ALGEBRA

ASSIGNMENTS

There are 10 homework assignments. The (planned) assignment schedule for the semester is indicated in the Course Calendar.

You should work all of the assigned problems. It will be to your advantage to write out your solutions in detail, carefully and neatly.

The problems to be turned in for grading are listed separately. These should be submitted either on or before the due date. Please submit these problems electronically (i.e., by e-mail) as a pdf file. In addition to accuracy, neatness will be taken into account.

In addition to the assigned problems in each chapter, you are encouraged to attempt some of the unassigned problems to reinforce your understanding of the material.
