
Information about Undergraduate Research Opportunities

Sponsored by The University of Houston's Pi Mu Epsilon Math Club

Event: Panel Discussion about Undergraduate Research Opportunities

Time: Friday, October 25 from 2–3PM

Place: Room SEC 204

Description: Are you interested in learning more about undergraduate research opportunities in mathematics, both at the University of Houston and elsewhere? This Friday we will have a panel of professors who will give some brief talks about undergraduate research opportunities, and then answer any questions you might have. This event will address questions such as the following:

- What are the benefits of doing undergraduate research?
- How do you find out about research opportunities?
- What kind of background do you need to do research?
- How do you apply to programs or talk to a professor about becoming part of a research project?
