Student Evaluations

Mathematics Department at the University of Houston conducts student evaluations at the end of every semester. I taught more than 40 classes at the University of Houston and received exceptional evaluations from students. The following are some quotations from these files. Some of the documents are included in the dossier; more documents are available upon request.

“I feel I learned, and learned well, more in this math class than I have learned in any other my course throughout my whole life.”

"Dr. Almus is a wonderful professor. She makes sure you understand the material. I will definitely take her again if she teaches other courses. Thank you, Dr. Almus"

“My instructor's conduct is excellent, and her ability to explain and solve every question is outstanding.”

“Failed two previous math courses until Ms. Almus taught me. Wonderful teacher who explains everything perfectly!”

"Dr. Almus motivated me to pass this course. I am not very good at math, but with her, it seems natural."

“This was by far the best math professor I have ever had. In previous year I struggled with math until taking this course, she was EXTREMELY clear and concise on the subject matter and she gave so many examples that it was IMPOSSIBLE not to understand the material.”

“I LOVED this class. I have a difficult time with math but Proff Almus is absolutely an amazing teacher who explains every little detail whether you’re a beginner or advanced in math. I'm currently looking into taking her for calculus!! BEST TEACHER EVER!!”

“The instructor is a saint. Seriously, she never missed one class, always on time. Also, super command of the subject. She is enthusiastic about the subject. She is able to convey the subject. She is a very good teacher. She loves and understands her subject. Please keep her on staff. She is excellent, and yes, that good.”

“So far Dr. Melahat Almus has been the best teacher I've ever had at UH. She's very entertaining, funny, and extremely knowledgeable in math. VERY GOOD MATH TEACHER!”

“Mrs. Almus is a great teacher. She engages her students with her playful sense of humor and attentiveness to the classroom's comprehension of the material. I wish she taught all the math classes I need. Math is not my favorite subject and she made it so much easier and more fun.”

“Professor Almus is the most helpful and caring math professor I have ever had. She was available several times a week outside of class for help and is very good with responding to emails. Very nice and understanding of students situations and a good instructor.”
"Great teacher, one of the best math teachers I have had here at UH."

"She is probably one of the best math teacher/professor that I have ever taken."

“Professor Almus is amazing. Keep her at U of H as long as you can. She was a great teacher and everyday she had an amazing attitude that let the whole class know she really loves math and enjoys teaching it. I especially enjoyed this class because math is something that has always been hard and boring until I took this class. Now it's not so bad, I hope to take her for my other math courses as well.”

“Prof Almus makes me want to be a math major. I love love loved her teaching style. Often, she would comment about how fun solving a problem was, and it always made me smile because I was thinking the same thing. She doesn't put up with nonsense in her classroom, which can be trying with a large group of freshman. Overall, I think she is an excellent teacher, and I was very sad to see that she isn't teaching the next course I need. I would take another of her classes in a heartbeat.”

"The best professor I have taken thus far. Very nice and helpful. The way she teaches is very effective and easy to comprehend. She is a definite recommendation to anyone that wants to take this course."

"Dr. Almus is a GREAT Professor. I really ENJOYED studying math although I used to hate math when I was in high school. My score in this course is 104/100 and all thanks to Dr. Almus. She is very supportive and answers questions even if they were sometimes obvious. She simply makes you love math and you will work hard because you want to get a high score. I can’t wait to have another class with her."

"Dr Almus is one of the best instructors at UH. I used to say we don’t have good Math instructors at UH until I took the class with Dr. Almus. She is so professional. She knows her subject very well. She gives a lot of examples, she makes us understand the subject no matter what. She is so helpful. She responds to our email to any question very fast. She is always available for us. I hope she teach advance Math classes, I would take her for sure, and I recommend her to anyone. She is the best. Thanks"

"Dr. Almus took the time to make sure that everyone had to opportunity to learn the material. Her respect for the students is UNMATCHED and I would recommend her to anyone that is taking a class she is teaching and I would love to have her as a professor again. She passes her passion for math when she is teaching making even "lame parts" interesting and fun!"

"Dr. Almus was a very thorough, helpful instructor who demonstrated the ability to understand questions and answer them in a succinct manner. She had a very strong understanding of the subject which she communicated well to the class."

“I feel I learned a lot. Ms. Almus is an excellent teacher.”
