

Math.1432-14838: Calculus II
Course Syllabus - Fall 2017

Instructor Name: Dr. Blerina Xhabli
Instructor Email: blerina@math.uh.edu
Instructor Office: PGH 202
Instructor Homepage: <https://www.math.uh.edu/~blerina/>

Course Number: Math.1432
Section Number: 14838
Lecture Time: TuTh 5:00pm – 6:30pm
Lab Time: MoWe 6:30pm – 8:00pm
Delivery format: Online
Prerequisites: Math.1431

Course Description: Calculus of transcendental functions: additional techniques and applications of integration, indeterminate forms, improper integrals, Taylor's formula, and infinite series.

Textbook: The learning materials for Math 1432, including the textbook, are available online in electronic form (PDF) through [CASA](http://www.casa.uh.edu) website at www.casa.uh.edu. **All students are required to purchase a Course Access Code at the Book Store to access the learning materials.** All the students have free access to [CASA](http://www.casa.uh.edu) for the first two weeks of classes with deadline Sep. 3rd. To have continuing access to all course materials at [CASA](http://www.casa.uh.edu), the students need to enter the course access code, which should be purchased for \$55 from the University Bookstore

The information contained in this class syllabus is subject to change without notice. Students are expected to be aware of any additional course policies presented by the instructor during the course.

Upon successful completion of this course, students will understand and be able to apply the ideas of differential and integral calculus to any functions, polar coordinates and parametric curves. They will develop skill in techniques and further applications of integration. They will understand convergence of sequences and series and be able to test for convergence. They will understand and appreciate the importance of power series and Taylor polynomials. Students will be able to use graphical information and symbolic expression simultaneously in solving mathematical problems. They will be able to translate ordinary language descriptions of problems into mathematical expression, derive solutions by rigorous mathematical methods, interpret their results, and explain them.

A student in this class is expected to complete the following assignments:

1. 4 Regular Exams
2. Final Exam
3. Online Quizzes
4. Homework Assignments
5. Poppers/Lab Quizzes (in-class quizzes given daily during the online lecture/lab sessions).

Components and Weights of Semester Assignments:

- Test 1: 5%
- Test 2: 15%
- Test 3: 15%
- Test 4: 15%
- Final Exam: 25%
- Online Quizzes: 10%
- Poppers/Lab Quizzes: 5%
- Homework(s): 10%

Grading Scale: If you call your average “x”:

As $90 \leq x$

Bs $80 \leq x < 90$

Cs $70 \leq x < 80$

Ds $60 \leq x < 50$

F $x < 60$

Poppers/Lab Quizzes: You will have daily poppers (short questions on the material from that day’s lecture or from the lectures prior to that day) every day, which will be given during the **online live lectures** and **recitation lab sessions**. You will find these assignments in your CASA accounts.

- The **online live lectures** will be held every **Tuesday/Thursday 5:00-6:30pm**.
Video recordings will be posted on the course webpage or on your CourseWare account.
There will be attendance popper questions in each lecture. Students who do NOT attend an online live meeting will be required to complete the questions given in the lecture video and notes by Sunday of that same week. Students get the questions by viewing the completed notes and watching the posted video.
Note: *Students are responsible for any content/announcements given during the live online lectures. Videos of the lectures are posted approximately 30 minutes after each class ends.*
- The **recitation (lab) sessions** will be held every **Monday/Wednesday 6:30-8:00pm**.
There is no separate recitation grade. You have signed up for lecture section and recitation (lab) section. The two sections are interwoven in the course, and a grade will be given for lecture course, representing the work in the combined classes. The lab session is a problem

working session that will meet twice weekly online. The lab attendance policy is the same as the lecture attendance policy above.

- The total number of popper/labquiz questions for the course will be counted, 85% of the total number of questions will be the 100%. For example, if we ask 5 questions each class for 24 classes, totaling to 120 questions, your grade will be calculated out of $120(.85) = 102$ points.

Online Quizzes: The quizzes are located in the [CASA](#) CourseWare course website under the “Online Assignments” tab. The quizzes will close on the due dates given on CourseWare at 11:59 pm and will not re-open. One of the lowest quizzes will be dropped. You have 20 times to take each quiz. There is a 60 minute time limit for each quiz. The following table shows what sections each quiz covers. All of the quizzes are open starting the first day of classes.

Quiz	Sections Covered	Quiz	Sections Covered
Quiz 1	Integration review	Quiz 14	8.5
Quiz 2	7.2-7.3	Quiz 15	9.1
Quiz 3	7.3	Quiz 16	9.2
Quiz 4	7.4	Quiz 17	9.3
Quiz 5	7.4-7.5	Quiz 18	9.4-9.5
Quiz 6	7.5	Quiz 19	9.5
Quiz 7	Exponentials, Logs review	Quiz 20	9.6
Quiz 8	7.6	Quiz 21	9.7-9.8
Quiz 9	7.7	Quiz 22	10.1
Quiz 10	8.1	Quiz 23	10.2
Quiz 11	8.2	Quiz 24	10.3
Quiz 12	8.3	Quiz 25	10.4
Quiz 13	8.4	Quiz 26	10.5

You should expect 2-3 quizzes per week.

Homework: Homework is going to be assigned weekly covering all the material seen during the prior week of lectures. You need to submit your homework via your [CASA](#) account.

- There are weekly assignments due every week starting the 2nd week of the semester.
- There are several grades that count in the homework category:
 - Written homework, problems from the textbook or assigned according to the instructor and uploaded into your [CASA](#) account.
 - Electronic multiple choice problems assigned by your instructor and entered on [CASA](#) CourseWare under the EMCF tab.
- All homework will be submitted in the [CASA](#) CourseWare website. See https://www.math.uh.edu/~bekki/Math1431and1432_usingCASA.pdf for how to upload the homework.
- Two of the lowest homework assignment scores will be dropped.

Discussion Board Participation: There is a class discussion board located on CourseWare at <http://www.casa.uh.edu>. Students are expected to post a question or reply to a post once a week. The participation is strongly recommended. Posts must be related to the course content to count. See https://www.math.uh.edu/~bekki/Math1431and1432_usingCASA.pdf for instructions on using the discussion board.

Tests: There will be 4 major tests, along with a mandatory final exam. The complete schedule is on your instructor's web page. All tests except Test 1, are taken at [CASA](#) testing center, with reservation. **You can NOT use calculators during the tests; study accordingly.**

- **Test 1:** Covers pre-requisite materials and will be online on CourseWare under Online Assignments with deadline to be **August 30, 2017**. You have only two attempts to take it.
- **Test 2:** Covers chapter 7 and will be in the [CASA](#) testing center **Sep. 22 – 25, 2017**.
- **Test 3:** Covers chapter 8 and will be in the [CASA](#) testing center **Oct. 14 – 17, 2017**.
- **Test 4:** Covers chapter 9 and will be in the [CASA](#) testing center **Nov. 11 – 14, 2017**
 - Tests 2-4 and the final will be given in [CASA](#) located on the second floor of Garrison or in CBB, see the exam scheduler for details.
 - You can access the scheduler for these exams by logging into [CASA](#) Courseware.
 - The exams given in [CASA](#) will consist of both multiple choice and written questions.
 - The multiple choice questions will be machine graded and the written questions (free response) will be graded by the instructors and teaching assistants.
- **CALCULATORS ARE NOT PERMITTED.**
- There will be a practice test on Courseware for each exam.
5% of your practice test score will be added to your exam score as bonus.
- The scheduler will be available approximately 2 weeks prior to the exam period.
- **Final Exam:** A comprehensive final exam will be given in [CASA](#).
 - The final will include chapters 7 through 10.
 - You can access the scheduler for this exam by logging into Courseware.
 - Dates: **December 11 – 13, 2017**.

Late Assignments, Make-Up and Incomplete Policies:

- This course is a cumulative course. You as a student need to keep up with the reading, homework assignments and exams. Thus late work or make-ups will not be accepted.
- The following is calculated for the final grade:
 - Two of the lowest homework assignments are dropped.
 - One of the lowest quizzes is dropped.
 - 85% of the total number of popper questions will be the 100%.
 - The final exam score can replace the lowest exam score.

Incomplete policy: A notation of "incomplete" may be given in lieu of a final grade to a student who has carried a subject successfully until the end of a semester but who, because of illness or other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination or to complete some limited amount of term work.

UH CAPS Statement

Counseling and Psychological Services (CAPS) can help students who are having difficulties managing stress, adjusting to college, or feeling sad and hopeless. You can reach CAPS (www.uh.edu/caps) by calling 713-743-5454 during and after business hours for routine appointments if you or someone you know is in crisis. No appointment is necessary for the “Let's Talk” program, a drop-in consultation service at convenient locations and hours around campus. http://www.uh.edu/caps/outreach/lets_talk.html

CSD Accommodations

Academic Adjustments/Auxiliary Aids: The University of Houston System complies with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, pertaining to the provision of reasonable academic adjustments/auxiliary aids for students who have a disability. In accordance with Section 504 and ADA guidelines, University of Houston strives to provide reasonable academic adjustments/auxiliary aids to students who request and require them. If you believe that you have a disability requiring an academic adjustment and/or auxiliary aid, please visit The Center for Students with Disabilities (CSD) website at <http://www.uh.edu/csd/> for more information.

Accommodation Forms: Students seeking academic adjustments/auxiliary aids must, in a timely manner (usually at the beginning of the semester), provide their instructor with a current Student Accommodation Form (SAF) from the CSD office before an approved accommodation can be implemented.

Details of this policy, and the corresponding responsibilities of the student are outlined in The Student Academic Adjustments/Auxiliary Aids Policy (01.D.09) document under [STEP 4: Student Submission (5.4.1 & 5.4.2), Page 6]. For more information please visit the Center for Students with Disabilities FAQs page.

Additionally, if a student is requesting a (CSD approved) testing accommodation, then the student will also complete a Request for Individualized Testing Accommodations (RITA) paper form to arrange for tests to be administered at the CSD office. CSD suggests that the student meet with their instructor during office hours and/or make an appointment to complete the RITA form to ensure confidentiality.

***Note:** RITA forms must be completed at least 48 hours in advance of the original test date. Please consult your counselor ahead of time to ensure that your tests are scheduled in a timely manner. Please keep in mind that if you run over the agreed upon time limit for your exam, you will be penalized in proportion to the amount of extra time taken.

Calculus II Topics List

Chapter 7 - Applications of Integration

- 7.1 Integration Review
- 7.2 Area
- 7.3 Volume
- 7.4 Centroids
- 7.5 Arc Length and Surface Area
- 7.6 Differential Equations and Exponential Growth/Decay
- 7.7 Improper Integrals

Chapter 8 - Techniques of Integration

- 8.1 Integration by Parts
- 8.2 Powers of Trigonometric Functions
- 8.3 Trigonometric Substitutions
- 8.4 Integrating Rational Functions
- 8.5 Numerical Integration

Chapter 9 - Sequences and Series

- 9.1 Sequences and Convergence
- 9.2 Numerical Series and Convergence
- 9.3 Tests for Convergence
- 9.4 The Power Series
- 9.5 The Taylor Series

Chapter 10 - Polar Coordinates and Parametric Equations

- 10.1 Polar Coordinates and Polar Curves
- 10.2 Area and Arc Length in Polar Coordinates
- 10.3 Parametric Equations
- 10.4 Derivatives for Curves Given Parametrically
- 10.5 Arc Length for Curves Given Parametrically
- 10.6 Surface Area
