## MATH 3307: Extra Credit for Homework 7

Reminders:

- Extra Credit questions are difficult and involve more work than a standard homework question.
- You will receive up to $10 \%$ additional points (not to exceed full credit) on the related Homework Assignment only. Keep in mind for an assignment graded out of 10 to 20 points, this is only 1 or 2 additional points.
- Unlike assigned homework questions, extra credit questions should not be brought to your instructor or to tutoring services for assistance.
- Correct Answers with valid explanation of your process will receive credit only.
- These are due the Sunday following their related Homework assignment by 11:59 pm.
- Submit Answers to https://forms.gle/yw89xJe8PBrqvF5J7 (Late Answers will not be accepted.)

A set of bivariate data has been collected and the results of explanatory variable, response variable and residuals resulting from a linear regression are presented (partially) on the following, incomplete table:

| Explantory | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Response | A | B | C | D | E | 36 | 38 | 41 | 41 | 43 |
| Residuals | -2.3 | 1.6 | 0.2 | -0.8 | -1.1 | F | G | H | I | J |

Determine the equation of the least squares regression line, rounding any values to four decimal places.
