Hi, everybody, and welcome to Math 1100. This course is a one hour credit online only course with an on campus final.

I am your course manager; you may call me Ms. Leigh. Note that I didn't say "teacher". This course is very different from any you've probably taken. Your teacher will be the teacher in the 3 hour course you are taking at the same time as this course.

Now, some of you are taking Math 1310, College Algebra, and some of you are in Math 1311, Functions and Modeling. This course has TWO sets of quizzes for you to chose from; one for each course. You will take one set of quizzes.

The first thing for you to do is sign up for the proper SUBSECTION of Math 1100. There is one, called 13100, for those in College Algebra and a separate one, called 13110, for those in Functions and Modeling. Note that the number is the same number as the course with a zero on the end.

Next Tuesday, first thing, go to our course website and pick the right subsection. The course website is:

space.uh.edu

You need to invent a login and password that you can remember and create your account with that tab in "space". (not Blackboard or Course Ware!) Use the subsection number (the one with the zero on the end) to set up your account.

If you get confused, your advisor can help you sort it out.

Space is not open this week. School starts Tuesday so you can sign up then.

Now, there's a link to space on my website along with a syllabus and a list of the quiz topics for each subsection. My website is:

www.math.uh.edu/~dog

If you have questions, just email me. I'll be posting my emails to you on my website. And I'll be emailing you a whole lot to make sure you finish up on the quizzes timely.

There are 15 or 16 quizzes depending on your subsection, so if you do one quiz a week you'll finish. If you do 2 a week, you can wrap it up before Spring Break. You just make an appointment with me to take your final and then, you're done! (Well assuming you make a 70% on the final, of course).

I'm looking forward to working with you this semester!

Ms. Leigh
