Hi, everybody,

Welcome to Math 1100. I am Virginia Hollyer and you may call me Ms. Leigh (my middle name). Now this is a one hour, online, mostly self paced course. You will need to take a proctored final either early or during finals for the semester.

I am your course manager. Note that I didn't say "teacher". There are not any instruction hours with the course. You have 15 or 16 quizzes to take by the end of the semester. You need to get at least a 70% on each quiz before you can take the next one. You have 20 tries at each quiz.

Now if you finish up early, you may contact me and take an early final here in my office and be TOTALLY DONE with the course. You need at least a 70% on the final and each quiz to pass the course.

So I'll be sending you email reminders throughout the semester. If you pass one quiz per week you'll finish up nicely.

The course has two subsections. Which one you are in depends on the core course you are taking this semester. If you are taking 1310, College Algebra, you will sign up for 13100. If you are taking 1311, you will sign up for 13110. You need to be in a core course as well as this course. If you are not, please go find a different one hour course to take.

The course management system is SPACE. The url for it is

www.space.uh.edu

It is not open now, but will open just past midnight, early Monday morning. So first thing Monday go there and pick out the proper subsection. Then after lunch knock out the first quiz.

My website has the syllabus and a list of quiz topics by subsection. I'll also post my emails there.

www.math.uh.edu/~dog

If you have questions, email me.

Ms. Leigh
