Log-in instructions for Q&A sessions:

1. Open Internet Explorer (this seems to work better than other browsers)

2. Enter the url --- www.uhlive.wimba.com

3. Click on Participant login

4. Enter your name (any name you want)

5. Click Enter

6. The next screen will say "Is your computer ready." Let's assume that it is, so don't run the Wizard. Just click the "click here" thing below the Run Wizard button.

7. You may be prompted to run something like Chatapl(????) --- I do it when it prompts me.

8. The next window will show a long list of "open rooms." Scroll down the long list to MathEtgen, click on that, and you should be ready to go.
