TEACHING EXPERIENCE

University of Houston

Math 4335: Introduction to PDE I

Method of characteristics, derivation of transport, heat, and wave equation, initial and boundary value problems, Fourier series, and harmonic functions.

(Fall 2023: 15 undergraduates, Spring 2023: 15 undergraduates, Fall 2022: 14 undergraduates, Fall 2019: 27 undergraduates).

Math 3334: Advanced Multivariable Calculus

Basic theory underlying multivariable calculus: a brief overview of the topology of n-space, limits, continuity and differentiation of functions of several variables, Taylor's theorem, the inverse and implicit function theorems, integration.

(Spring 2023: 12 undergraduates, Spring 2022: 15 undergraduates)

Math 2318: Linear Algebra

Solutions of systems of linear equations, matrices, vector spaces, linear transformations, similarity, eigenvalues and eigenvectors.

(Spring 2022: 25 undergraduates)

Math 6326: Partial Differential Equations

This graduate level course introduces four main types of partial differential equations: parabolic, elliptic, hyperbolic and transport equations. The focus is on existence and uniqueness theory. The course will touch on applications and a brief introduction to numerical methods: finite differences, finite volume, and finite elements.

(Fall 2021: 14 graduate students)

Math 3363: Introduction to Partial Differential Equations

Partial differential equations and boundary value problems, Fourier series, the heat equation, vibrations of continuous systems, the potential equation, spectral methods.

(Spring 2021: 90 undergraduates).

Math 3331: Differential Equations

Systems of ordinary differential equations; existence, uniqueness and stability of solutions; initial value problems; bifurcation theory; Jordan form; higher order equations; Laplace transforms.

(Spring 2021: 76 undergraduates)

Math 6360: Applicable Analysis

Solvability of finite dimensional, integral, differential, and operator equations, contraction mapping principle, theory of integration, Hilbert and Banach spaces, and calculus of variations.

(Canceled due to low enrollment)

Math 4362: Theory of Diff. Eq. and Nonlinear Dynamics

ODE as models for systems in biology, physics, and elsewhere. Existence and uniqueness of solutions, linear theory, stability of solutions and bifurcations in parameter space.

(Spring2024: 10 undergraduates, Spring 2020: 20 undergraduates)

Math 1451: Accelerated Calculus II

Fast paced course covering vectors, equations of lines and planes, multivariable calculus, Greens' and Stokes' Theorem, and applications.

(Spring 2019: 22 undergraduates)

Math 1450: Accelerated Calculus I

Fast paced course covering derivatives, integrals, sequences and series, and applications. (Fall 2018: 37 undergraduates)

The University of Arizona

Advanced ODE:

Fall 2017

General theory of initial value problems, linear systems and phase portraits, linearization of nonlinear systems, stability and bifurcation theory, an introduction to chaotic dynamics.

UTA Seminar:

The seminar is geared towards undergraduate students who are working as teaching assistants. It consists of a series of workshops designed to provide training in tutoring, grading, and lecturing. It culminates with students presentations on a math subject of their choice.

Applied PDE:

Sturm-Liouville operators, separation of variables, distributions, Green's functions, Fourier series, Fourier Transform, and the method of characteristics. Applications include wave, diffusion, and Laplace's equation.

Analysis of ODE:

Linear and nonlinear equations, basic solution techniques, qualitative and numerical methods, systems of equations, applications drawn from physical, biological and social sciences.

University of Minnesota

Advanced Calculus I:

Axioms for the real numbers. Techniques of proof for limits, continuity, uniform convergence. Rigorous treatment of differential/integral calculus for single-variable functions. College Algebra: Summer 2011

Algebra, analytic geometry explored in greater depth than is usually done in three years of high school mathematics.

Teaching Assistant:

Calculus I CSE Multivariable Calculus Differential Equations and Linear Algebra CSE Calculus II Calculus II Calculus I Spring 2015 Fall 2011-Spring 2013 Spring 2011 Fall 2010 Spring 2010 Fall 2009
